

5.10.1 Traffic Impacts

- A. The applicant shall undertake an assessment of the potential air quality and traffic impact of development projects if the projects entail new construction or land use changes which meet the thresholds established in the current version of the "Guidelines for Traffic Impact Studies and Air Quality Analysis in Jefferson County, Kentucky" or successor document as approved by the Planning Commission (see **Appendix 6E**). The study shall be prepared in conformance with the standards contained in **Chapter 6 Part 5**. The assessment shall identify potential adverse impacts and recommend mitigation measures to avoid or eliminate such impacts. The applicant and subsequent developer(s) shall implement said measures, as required by the approved final study.
